

[All Data Online Car Repair](#)

Need to repair your car? This is the database for you. Some of the features of this database include:

1. Wiring diagrams. All Data Online includes diagrams for every vehicle back to 1982. The wiring diagrams retain their clarity when zooming and allow you to search for information easier by finding and highlighting the text of the repair articles based on specific keywords within the diagram.
2. Technical Services bulletin. Posts information regarding recalls including why something was recalled and the service needed to fix the issue.
3. Maintenance. Provides information on the types of maintenance and a suggested schedule of when inspections and related services should be done.

You will need to visit the library to use this database. For more information, call the reference desk at (626) 384-5293.
