CERTIFIED ACCESS SPECIALIST INSPECTION SERVICES

Compliance with state and federal construction-related accessibility standards ensures that public places are accessible and available to individuals with disabilities. By engaging the services of a Certified Access Specialist (CASp) before you move into a newly constructed facility or alter your current facility, you will benefit from the advantages of compliance and benefit from legal protections under the Construction-Related Accessibility Standards Compliance Act (CRASCA, Civil Code 55.51-55.545).

Although your new facility may have already been permitted and approved by the building department, it is important to obtain CASp inspection services after your move-in because unintended access barriers and violations can be created, such as placing your furniture and equipment in areas required to be maintained clear of obstructions. For planned alterations, a CASp can review your improvement plans and provide an access compliance evaluation of your facility's public accommodation areas that may not be part of the alteration.

A CASp is a professional certified by the State of California to have specialized knowledge on the applicability of accessibility standards. CASp inspection reports prepared according to CRASCA entitle business and facility owners to specific legal benefits in the event that a construction-related accessibility claim is filed against them. To find a CASp, visit www.apps2.dgs.ca.gov/DSA/casp/casp_certified_list.aspx.
